Understanding the Catholic faith with a new AI-inspired app

Majellan Media has developed a new Artificial Intelligence-inspired (AI) app that delivers quick and reliable answers to people's questions about the Catholic Church and its teachings.

Titled *FaithGuide*, it is free to use and is ideal for newcomers to the Church and those seeking to deepen their faith. From sacraments to saints, *FaithGuide* makes exploring the rich history of the Catholic Church much easier.

The app aligns its responses with the Catechism and Canon Law, ensuring accuracy and authenticity. People can unveil the profound teachings of theologians and the historical milestones that have shaped the Church over many centuries.

FaithGuide is designed to provide straightforward answers to questions about the Catholic faith, no matter how complex or simple they may be. Wondering about the sacraments? Curious about the role of the pope or eager to explore the lives of saints and their teachings? All you do is enter your question, and in an instant, a clear and concise response will be provided.

Majellan Media CEO Tony Biviano says the new initiative will be helpful people who are inquisitive about Catholic Church traditions. "While no doubt some people will have reservations about AI technology, this initiative is an example of how it can help people and provide swift and accurate answers," says Mr Biviano.

"I hope people will give the app a try to see what it can do. By combining cutting-edge AI technology with the timeless wisdom of the Catholic Church, *FaithGuide* offers an unparalleled platform for people of all backgrounds to explore the tenets of the Catholic faith."
